ABOUT ME

Software Engineer with hands-on experience building and fixing enterprise applications in C#/.NET, JavaScript/TypeScript, Angular and SQL Server, with C and C++ in my skill set. I completed a software engineering internship at Scienter, working in an Agile team to find and fix bugs, add features and support releases. I am curious about how things work, patient when debugging a problem to its cause, comfortable developing on Windows, and keen to learn InDesign scripting with ExtendScript and UXP.

SKILLS

Languages: C#, C++, JavaScript, TypeScript, Python, Java, C, SQL

Backend & Frontend: .NET / ASP.NET Core, Angular, Node.js, HTML5, CSS3, RESTful APIs, React, Dapper ORM

Databases & Reporting: Microsoft SQL Server, stored procedures, query optimization, SSRS, PostgreSQL, MySQL, MongoDB

AI & ML: TensorFlow, CNNs, image recognition, predictive modeling

Tools & Practices: Git/GitHub, Windows, Linux shell basics, AWS fundamentals, Agile/Scrum, ERP integration

EXTRA CURRICULAR ACTIVITIES

SIS & Leo Club: Engaged in community service and leadership.

Interact Club: Coordinated social service and fundraising.

Athletics (Rugby & Swimming): Cultivated discipline through competitive sports.

Environment Society (President): Led school sustainability projects.

REFEREES

Dr Gayana Fernando
Head - School of Information Technology
SLIIT City Uni
Tel: 011 754 3600

WORK EXPERIENCE

SCIENTER TECHNOLOGIES (PTE) LTD - SOFTWARE ENGINEER INTERN
Jun 2026 - Nov 2026

- Worked in an Agile team building fintech applications with .NET, SQL Server and Angular. Built REST API integrations and wrote SQL stored procedures for live business applications. Found and fixed bugs, added features and supported deployments across the Angular and C# code. Visited customer sites to demonstrate and set up systems.

FREELANCE IT ADMINISTRATOR – EVANZ CLOTHING (PART-TIME)
Feb 2025 - Present

- Look after the company's e-commerce system and internal databases, keeping them running with 99.9% uptime. Handle day-to-day technical issues and system maintenance.

EDUCATION

BSc (Hons) in Computer Science | Expected June 2027
University of Bedfordshire

Higher National Diploma in Information Technology | 2024-2026
SLIIT City University (SCU) | GPA 3.5 | Dean's List (Year 2, Semester 2)

Foundation Certificate in IT | 2023-2024, SLIIT City Uni (SCU)

G.C.E. Ordinary Level (2022/23) | Wesley College, Colombo | 4As, 2Bs, 3Cs

CERTIFICATIONS

- **AI Generation Bootcamp** (2026), STEMLINK
- **Certificate in AI Course** (2025), SLIIT City Uni (SCU)
- **HP LIFE Professional Certifications** (2026)
- **English Diploma**, British Council
- **AWS Cloud Practitioner Essentials** course (2026), AWS
- **Operating Systems Basics** course (2026), Cisco Networking Academy

PROJECTS *(Completed during internship at Scienter Technologies)*

Destinity Container Maintenance System - Container logistics platform.

- Worked on rebuilding the system using Angular and C# to make it faster and easier to scale. Wrote SQL Server stored procedures for live tracking and filtering of containers.

Destinity Payroll System - HR and payroll system.

- Built the EPF/ETF file generation feature in C#, replacing the manual process. Created new Angular components and improved the leave calculations. Fixed bugs across the Angular and C# code to make payroll results accurate.

Client Maintenance System - Company system for managing clients and distributors.

- Built SSRS reports and SQL Server stored procedures, added Angular components, fixed bugs, and worked on the ASP.NET Core and Angular upgrade.

Sales Inventory & Destinity Management Systems - Inventory control, ERP integration and warehouse logistics platforms.

- Built ERP-connected features and Angular components for inventory, sales and logistics tracking. Wrote SQL Server stored procedures and improved C# API endpoints and queries for sales transactions. Fixed bugs and deployed updates across the Angular and C# code.

PROJECTS

TripMate AI - AI travel assistant.

- Automatically builds full trip itineraries by finding real-time flight and hotel options.

AI Food Intelligence System - Smart recipe and nutrition app.

- Analyzes the ingredients a user has in their kitchen and suggests healthy recipes with full nutrition facts.
