ABOUT ME

Software and AI engineer with hands-on experience in API integrations, process automation and database-driven systems (PostgreSQL, SQL Server). Built AI-powered applications, including a travel itinerary assistant and a nutrition-aware recipe recommender, and developed AI and computer vision models with TensorFlow. Maintains 99.9% uptime for production systems within Agile teams. Keen to deepen expertise in workflow automation, LLM integrations and MCP.

SKILLS

- **Automation & Integration:** RESTful APIs, system and ERP integration, process automation, Dapper ORM
- **AI & ML:** AI-powered applications, TensorFlow, CNNs, image recognition, predictive modeling
- **Databases:** PostgreSQL, Microsoft SQL Server, MySQL, MongoDB, stored procedures, query optimization
- **Languages:** Python, C#/.NET, TypeScript, JavaScript, Java
- **Backend & Tools:** ASP.NET Core, Node.js, Angular, AWS, Git/GitHub
- **Professional:** Technical communication, collaboration in Agile teams, problem-solving

REFEREES

Dr Gayana Fernando
Head - School of Information Technology
SLIIT City Uni
Tel: 011 754 3600
gayana.f@sliit.lk

Dr Nipunika Vithana
Senior Lecturer, Faculty of Computing and Technology
SLIIT City Uni
Tel: 011 754 3612
nipunika.v@sliit.lk

WORK EXPERIENCE

SCIENTER TECHNOLOGIES (PTE) LTD - SOFTWARE ENGINEER INTERN
Jun 2026 - Present
- Develop and optimize enterprise fintech applications using .NET, SQL Server and Angular within an Agile team.
- Build REST API integrations, SQL stored procedures and automated data processes for production business applications.

EVANZ CLOTHING - TECH ADMINISTRATOR (PART-TIME)
2025 - Present
- Maintain 99.9% uptime for e-commerce operations and internal databases, ensuring reliable system availability.

EDUCATION

BSc (Hons) in Computer Science | Expected June 2027
University of Bedfordshire

Higher National Diploma in Information Technology | 2024-2026
SLIIT City University (SCU) | GPA 3.5 | Dean's List (Year 2, Semester 2)

Foundation Certificate in IT | 2023-2024, SLIIT City Uni (SCU)

G.C.E. Ordinary Level (2022/23) | Wesley College, Colombo | 4As, 2Bs, 3Cs

CERTIFICATIONS

- AI Generation Bootcamp (2026), STEMLINK
- Certificate in AI Course (2025), SLIIT City Uni (SCU)
- HP LIFE Professional Certifications (2026): Critical Thinking in the AI Era; Professional Networking for Career Growth
- English Diploma, British Council
- Certificate in Basics of IT (2019), Crystal Computer College

AI PROJECTS

TripMate AI - AI travel assistant.
- Automatically builds full trip itineraries by finding real-time flight and hotel options.

AI Food Intelligence System - Smart recipe and nutrition app.
- Analyzes the ingredients a user has in their kitchen and suggests healthy recipes with full nutrition facts.

PROJECTS *(Completed during internship at Scienter Technologies)*

Destinity Container Maintenance System - Enterprise container logistics platform.
- Led a full-system Angular/C# revamp for responsiveness and scalability. Engineered SQL Server stored procedures for real-time tracking and filtering.

Destinity Payroll System - Automated HR and compensation solution.
- Automated EPF/ETF file generation and optimized dynamic leave calculations, replacing repetitive manual payroll work. Resolved full-stack bugs for accurate payroll processing.

Client Maintenance System - Corporate portal for managing client and distributor networks.
- Upgraded ASP.NET Core and Angular versions to modernize the architecture. Maintained RESTful APIs using Dapper ORM for seamless database synchronization.

Sales Inventory System - Inventory control and ERP integration platform.
- Developed ERP-integrated features to enhance real-time tracking. Optimized C# API endpoints and SQL queries for high-volume sales transactions.

Destinity Management System - Platform optimizing inventory routing and facility operations.
- Fixed critical defects and deployed features across the Angular/C# stack. Enhanced logistics tracking to streamline daily warehouse distribution.
